

EST Analytical and the Cool Climate Oenology and Viticulture Institute (CCOVI), Brock University

Would like to invite you to a
Demonstration of the
**Thermo Konelab Industrial
Wet Chemistry Analyzer**
Tuesday, June 28, 2005 1:00 – 5:00
OR June 29, 2005 9:00 – 1:00

Refreshments will be provided

EST Analytical will be demonstrating the efficiency and accuracy of running both wine and water chemistries on a **Konelab** automated system. We will be running L-Malic Acid, Glucose + Fructose and Free SO₂ analysis in white wine and Nitrite in water samples.

The **Konelab** Arena instruments are fully automated Photometric analyzers. The rugged design makes it a perfect solution for industrial applications. Disposable cuvettes eliminate carry over and contamination between samples and reagents. Automatic dilution capabilities to 1+119 built into the methods. Ability to run multiple chemistries at the same time without user intervention. Flexibility, Accuracy and Precision Precision adds the Quality Control you need to make your business successful. From low ppb to high ppm to % level analysis, the Konelab Arena delivers the speed and process control you're looking for.
