

## **Staff Qualifications**

At Youth University we recognize that a high quality program must be built on a foundation of high quality staff. It is for this reason that our staff are selected and trained to represent the highest standard in service, commitment and quality in experiential education

Our staff are outstanding leaders, role models, and experts in their chosen fields. They are carefully selected for their professionalism, expertise, attention to safety, and love for helping people to learn and develop through adventurous learning experiences. All of our staff receive comprehensive training in experiential learning theory and activities, facilitation skills, and risk management. We also provide our climbing staff with technical training on our low and high ropes course and our climbing wall. It is required that all program delivery staff be trained in standard first aid and CPR and have a current police check during spring and summer season.
