

# Environmental Sensitivities

## **Fragrance Recommendation/Policy**

There may be a co-worker or student in your area whose health is being negatively affected by the personal products you use. Please be sensitive to these needs by not using or at least minimizing your use of fragrance products at the University. In response to the needs of consumers, many products today offer fragrance free alternatives. Individuals who wish to self-identify their work area as fragrance free, may use the Fragrance Free Zone Sign, which you can download, print and post in your area. Those with significant fragrance-related health effects may wish to contact Environment, Health and Safety at [oehs@brocku.ca](mailto:oehs@brocku.ca) to arrange more formal accommodation, where possible.

## **Other Environmental Sensitivities**

Workers exposed to substances such as latex or mold and who have sensitivities to such substances should contact staff in the Environment, Health and Safety office. Accommodation needs will be dealt with on an individual basis.
