Reviewing your Practice Test

You are **strongly urged** to take the practice test **exactly as you would the in-person test**, that is, in one sitting without aids (including without a calculator). You can attempt the Practice Test as many times as you like, but you are **strongly encouraged** not to simply repeat the test until you score a 70% or greater without first reviewing your most recent attempt. After you have completed at least one Practice Test, follow the instructions below to carefully review your previous attempts. Correct answers to each question will be visible.

- 1) Log into Brightspace, then Log into Möbius.
- 2) On that screen, hover over "Gradebook" on the left side of the screen near the top, and click on "View Past Results" in the drop-down menu (See image below).

4) Click on "Details" in the assignment list for the attempt that you want to see. The next screen will show your graded test.

Note what you have done wrong and review material in areas that you have difficulty. If you have made a syntax error, learn how to enter your solutions into Möbius by carefully <u>using the notation guide</u> and the preview button in Möbius. For a place to start your review of the mathematics content, see our

<u>Review Resources</u>. Use your mistakes to help identify weaknesses and strengths before you write the inperson test.

Tips for Success

- 1. Read each question **carefully** before answering.
- 2. Take the Practice Test **and then review** as needed before taking the in-person test, so that you are familiar with the testing system and are well prepared.
- 3. Explore the <u>review resources</u> available to ensure you are comfortable with all material covered.
